

# The Innovative Answer for More Oil and Gas

Our solutions are proven to increase sustained incremental production from heavy oil wells by 30%.  
 Enova's proprietary technology improves injection rates by 25% for waterflood injection wells.  
 Our team meets these and similar challenges facing petroleum producers like you.

**Our unique processes and innovative solutions address the key challenges faced in producing hydrocarbons from existing reservoirs:**

- Increasing Production Rates**
- Offsetting Production Rate Declines**
- Recovering More Oil**
- Enhancing Injection and Disposal Rates**

## **First We Listen. Then Develop the Unconventional.**

At Enova we carefully listen to your specific challenges. Then our exceptional team develops cost-effective solutions tailored to the unique needs of each well or reservoir.

The power of our solutions is based upon Enova's proprietary processes and technologies. Our unconventional approach produces a superior ROI with minimal impact on your operations, freeing up valuable resources to deal with other important obligations.

# 100 Years of Combined Knowledge

**Our ability to build these innovative solutions is based upon over 100 years of combined expertise. We've always been focused on downhole operational issues of all kinds. That's why we've spent years assembling a spectrum of specialized talents for our remarkable team.**

The Enova group has extensive experience and success in petroleum engineering, production, project management, chemistry, research and development as well as fabrication disciplines. This unique combination allows us to rapidly develop and implement creative solutions.

## **Compatible with Your Environment**

Enova's customer service and project management teams make certain that our solutions are delivered on-time and safely. Our teams ensure that we are fully compatible with your operations and the environment.

## **Consider Today. And Tomorrow.**

Because Enova's unconventional approach does not require significant capital investments or scarce resources, our solutions can be deployed for proactive programs as well as addressing current problems.

## **The Markets We Serve**

Heavy Oil Fields  
Disposal Wells  
Waterflood Fields  
Thermal Fields  
Gas Fields  
Light Oil Fields
